GELCOAT PRODUCT FAMILY

Defining the Standard of Surface Excellence

In the world of composites, quality is recognized at first sight-and it begins at the surface. Our high-performance Gelcoat Product Family is designed for ambitious manufacturers who aim to define the standard, not follow it. This portfolio provides more than just raw materials; it delivers **faster production**
perception.

Not Just a Product-Total Control

With a broad range of chemistries-including ISO, ISO-NPG, VE, and Urethan
control over **rheology**, chemical structure, and final surface performance. The result is a process with no surprises, minimal waste, and consistent quality.

Key Features

Application Excellence: Optimized for both brush and spray to eliminate sagging, wavines

Next-Gen Efficiency: Higher surface gloss and lower consumption compared to conventional products.

Specialty Solutions: Includes antistatic and sandable DCPD gelcoats for specialized industrial needs.

Mold Longevity: High heat resistance (HDT) and cracking resistance for a longer mold service life.

Applications

- High-aesthetic consumer products in gloss or matte finishes.
- Marine, automotive, and industrial enclosures.
- High-performance mold making and surface correction.
